Hindi

Antor Sharkar

Motivated and detail-oriented Android developer with experience in Java, Android Studio, Firebase, and TensorFlow Lite, gained through academic and personal projects including a deep learning-based road defect detection app. Adaptable and quick to learn, I am passionate about building user-focused mobile solutions and contributing to innovative teams with creativity, responsibility, and a strong work ethic.

Technical Skills

Mobile Application Development

- JAVA (Android), Flutter (Android), REST API Integration, Firebase (Authentication, Firestore), UI/UX Design Principles

Machine Learning & Image Processing

- Image Processing, Deep Learning Models (MobileNetV2, DenseNet201, Xception, Hybrid Model), Data Preprocessing and Dataset Handling

Database Management

- MySQL, Firebase Realtime Database / Firestore

Programming Languages

- C, Java, Python, Dart (Flutter), HTML, CSS

System & IT Support

- System Maintenance and Performance Optimization, Computer Hardware & Software Troubleshooting

Networking & CCNA Knowledge

- Basic Network Security & Troubleshooting

Projects

Road Defect Detection System (Thesis Project)

- Developed an image processing-based system to detect road defects using deep learning techniques.

Task Manager (University Project)

- Designed and developed a task management system for academic use.

Mess Manager – Mobile Application (Flutter)

- Designed and developed a task management system for academic use.

Tools And Technology

- Version Control:** Git, GitHub
- Development & IDEs:** Visual Studio Code, Android Studio
- Mobile Development Framework:** Flutter, JAVA (App Development & UI/UX)
- Database & Backend Services:** Firebase (Authentication, Firestore), MySQL
- Networking Tools:** Basic Router Configuration, Network Troubleshooting, CCNA Labs
- Deployment & Hosting:** GitHub Pages
- Office & Productivity Tools:** Microsoft Office Suite (Word, Excel, PowerPoint)
